PROFESSIONAL PROFILE

MCA-qualified software professional with a strong foundation in software engineering principles, problem-solving, and system design. Experienced in developing and optimizing scalable applications and contributing to solutions that enhance organizational efficiency. Versatile in working across diverse technologies and quick to adapt to evolving technical environments. Recognized for analytical thinking, reliability, and delivering high-quality outcomes in fast-paced settings.

PROFESSIONAL EXPERIENCE

Web Developer

July 2025 – Present

NPR Group of Institutions · Dindigul

- Designed and maintained internal enterprise applications supporting academic and administrative workflows.
- Optimized database performance and backend processes to efficiently handle high-volume concurrent usage.
- Developed modular, user-centric system components to enhance operational efficiency and usability.

PROJECTS

Student Grade Management System

Java · File I/O · OOP

- Developed a comprehensive system to manage student records, enabling CRUD (Create, Read, Update, Delete) operations on grades and personal details.
- Implemented persistent data storage using File I/O to ensure records are saved across sessions and utilized OOP principles for modular design.

Course Registration Platform

1,000+ Active Students

- Developed a scalable course registration system that significantly reduced manual processing efforts.
- Implemented efficient request handling mechanisms to ensure stability during high-traffic operations.

Letter Communication Portal

Institutional Deployment

- Designed and implemented a digital workflow system to streamline request and approval processes.
- Incorporated automated tracking and data management features to enhance process visibility and efficiency.
